

SAN PITCH RIVER DISTRIBUTION SYSTEM

** 1970 WATER ASSESSMENT **

\$ 2,500.00

BASIS OF ASSESSMENT:

The Annual Water Assessment is now calculated upon the Commissioner's Annual Report of Water delivered in the previous year (1969) instead of the previous 5-years average delivery.

CALCULATION OF ASSESSMENT:

(1) Total amount of acre-feet of water delivered in 1969 as reported by the Commissioner was 34,807.28 acre-feet.

(2) \$ 2,500.00 divided by 34,807.28 acre-feet of water equals \$ 0.0718240552, cost of one pro-rata acre-foot of water used during the year of 1969. This multiplied times the amount reported as used by each user equals his or her 1970 Water Assessment.

PROOF:

\$ 0.0718240552 times 34,807.28 equals \$ 2,500.00

Mr. Don Norseth:

Division of Water Rights

Dear Don:

In answer for your request for the
Annual Report on San Pitch River.

You will note for each Company
it is made out 100%. with the
Ditches all lined it gives them
Plenty of water.

Yours truly

Blaine Draper

Commissioner
